Enterprise Remote Work Policy

Purpose

This policy defines expectations for employees working remotely or in a hybrid arrangement.

Eligibility

Employees may work remotely when their role, manager approval, and business needs allow it. Some roles may require regular on-site work.

Working Hours

Employees should be available during their team's agreed core hours. Employees must keep their calendar and communication status reasonably up to date.

Equipment

Company-provided laptops and approved peripherals must be used for company work. Employees are responsible for protecting equipment from loss, theft, and unauthorized access.

Security

Employees must use the company-approved VPN when required, avoid public computers for company work, and never share company credentials.

Communication

Teams should use approved collaboration tools for work communication. Urgent issues should be escalated through the team's designated communication channel.

Performance

Remote employees are held to the same performance, attendance, and delivery expectations as employees working on-site.
